Welcome to the *Super Easy Songbook* series!

This unique collection will help you play your favorite songs quickly and easily. Here's how it works:

- Play the simplified melody with your right hand. Letter names appear inside each note to assist you.
- There are no key signatures to worry about! If a sharp \sharp or flat \flat is needed, it is shown beside the note each time.
- There are no page turns, so your hands never have to leave the keyboard.
- If two notes are connected by a tie , hold the first note for the combined number of beats. (The second note does not show a letter name since it is not re-struck.)
- Add basic chords with your left hand using the provided keyboard diagrams. Chord voicings have been carefully chosen to minimize hand movement.
- The left-hand rhythm is up to you, and chord notes can be played together or separately. Be creative!
- If the chords sound muddy, move your left hand an octave* higher. If this gets in the way of playing the melody, move your right hand an octave higher as well.

* An octave spans eight notes. If your starting note is C, the next C to the right is an octave higher.
